

FACILITIES

Designed and built to perform ligand binding assays for the biotechnology and pharmaceutical industry.

- 15,000 square feet of total laboratory space including dedicated spaces for:
 - Cell based assays
 - Bioanalytical assays
 - Reagent characterization
 - Biomarkers
 - Sample handling and storage.
- 14,000 square feet of office and meeting space
- 24 hour monitoring of freezer and refrigerators
- 300 kW Diesel generator backup
- Restricted electronic card access to laboratory and sample storage space
- Secure on site Archival storage and data storage
- GLP compliant operations
- Validated Instrumentation

Dedicated support groups:

- Reagent Preparation and Qualification
- Quality Control
- Quality Assurance
- Document Control
- Sample receiving and handling
- Business Operations
