

# Facilities

*Designed and built for ligand binding based bioanalytical and biomarker sciences*

29,000 ft<sup>2</sup> of space with dedicated labs for:

Bioanalytical Assays

Biomarkers

Cell based Assays

Reagent Characterization

Sample Management

## PURPOSE-BUILT INFRASTRUCTURE

- 24 Hr Storage and Environment Monitoring
- 300 kW Diesel generator backup
- Role-specific keycard access to site, lab and sample storage spaces
- Secure on-site Archival storage and Data storage
- GLP compliant operations
- Validated Instrumentation
- Watson LIMS

## DEDICATED FOCUS TEAMS

- Method Development
- Reagent Preparation and Qualification
- Quality Control
- Quality Assurance
- Document Control
- Sample Receiving and Handling
- Business Operations
